

JOB DESCRIPTION

JOB TITLE: Project Engineer
LOCATION: Agrate Brianza (MB) Office

International Company is currently looking for one Technical Project Engineer (M/F) who already has 3-5 years of experience in Electrical Industrial applications or Ex power distribution field.

JOB PURPOSE:

Working within the technical team and reporting to the Technical manager, the job holder will work to manage small and medium regional projects. The main functions of the role and responsibilities are as follows:

Step 1 - Pre-award phase/ proposals:

- Analysis of full documentation received within the RFQ
- Project cost evaluation & optimization
- Technical clarification requests
- Quantify and compare alternative solutions that can be introduced to client.
- Provide technical support to the proposal and sales team.
- Attend bid clarification and project meetings where required.

Step 2A – Post award phase / medium projects:

- Basic Engineering
- Detail Engineering coordination/supervision
- Project Management (planning, logistics coordination, project controlling)

COMPETENCIES REQUIRED:

- Customer Focus
- Drives for Results
- Highly motivated, proactive

EDUCATION/SKILLS/EXPERIENCE

Required:

- Qualified to Degree level in an Electrical Engineering or Mechanical Discipline
- Minimum of 3 years in a PE role or 5 years previous experience in an electrical site or estimating role.
- Experience in Electrical or Heat management or power distribution in Oil & Gas field, petrochemical or process environments.
- Previous experience of working closely with Engineering departments.
- Proficient in the use of Microsoft Excel, Word and AutoCAD.
- Native Italian and fluent English language is mandatory; German or Spanish could be a plus.
