

eltherm - A Heat Tracing Leader

Your North American Source for Heat Tracing Products and Solutions

eltherm's North American headquarters and distribution center provides full sales and technical support for eltherm's North American approved electrical heat tracing products. Our experienced team of heat tracing experts have many years of application and product knowledge, give us a call, we're here to help!

Trust the Experts

With many decades of experience and a continuous drive to provide the highest quality products, eltherm is a global leader in the supply of electrical heat tracing systems and custom solutions to meet our customer's highest expectations.

With offices located in Europe, Asia and North America, and a global network of highly specialized and qualified representatives, an eltherm expert is never far away.

IcePrevent – Pre-assembled Plug-In Heating Cable System for Small Pipes, Roof and Gutter De-Icing

innovations in heat tracing

IcePrevent

Pre-assembled Plug-In Heating Cable System for Small Pipes, Roof and Gutter De-Icing

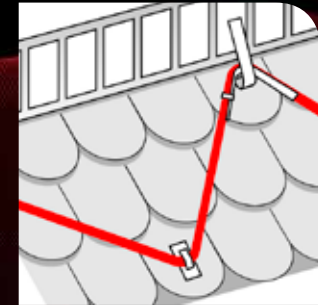

eltherm, a leading supplier of electrical heat tracing products for industrial, commercial and residential applications presents IcePrevent, a fully integrated heating cable solution for freeze protection of water pipes, gutters, downspouts, water drains and run-offs. Pre-assembled and ready-to-use.

eltherm's IcePrevent is the perfect solution for a reliable, worry-free installation to maintain flowing water in the harshest conditions.

IcePrevent is based on eltherm's proven self-regulating heating cable technology, an extremely reliable and maintenance-free heat tracing cable designed for a long service life and worry-free operation. Self-regulating heating cables do not generally require temperature control, an optional thermostat is available for most efficient and economical configuration.

- energy savings
- safe to use on common plastic pipes or gutters and downspouts
- can be overlapped, will not create hot spots or burn out

Pre-assembled heat tracing kits are the perfect solution for installation on small diameter pipes and water drainage systems, eltherm's kits are available in multiple fixed length assemblies, in either 120 VAC or 240 VAC power configuration and are ready for plug-in to ground fault protected outlets.

- Pre-assembled, ready to install
- wide selection of fixed length heating cable lengths
- based on eltherm's proven self-regulating heating cable technology
- easy-to-use, no maintenance design
- optional plug-in thermostat available

Each eltherm pre-assembled kit comes complete with 36-inch cold lead and power plug. Available options include plug-in thermostat, portable GFCI, roof clips.

ELSR-NA Pre-assembled Kits
120V, 7W/ft @41°F

Part No.	Product Description
ECK-7AO-006	assembly kit, 6 ft length
ECK-7AO-012	assembly kit, 12 ft length
ECK-7AO-018	assembly kit, 18 ft length
ECK-7AO-025	assembly kit, 25 ft length
ECK-7AO-050	assembly kit, 50 ft length
ECK-7AO-075	assembly kit, 75 ft length
ECK-7AO-100	assembly kit, 100 ft length
ECK-7AO-125	assembly kit, 125 ft length
ECK-7AO-150	assembly kit, 150 ft length
